

Cloud Migration Assessment

Build your way to a Managed Services future

Gain clear insight into your current infrastructure and applications to create a **roadmap to Managed Services**

Our cloud infrastructure and application assessment of your environment, providing valuable insights into your current status and a high-level roadmap to Managed Services.

Our Journey to the Cloud framework is designed to support you achieve your cloud adoption goals.

How We Deliver

This assessment is conducted to review and analyze your infrastructure and applications delivering valuable insight into the current state of your IT landscape.

We will develop a high-level design and migration roadmap for moving assets into Managed Services on Multi-Cloud through:

- 1. Understanding** your business objectives. Information gathering workshops with technical and business stakeholders to help review documentation, architectural gaps, business goals, and challenges.
- 2. Analyzing** your infrastructure and workloads. The information gathered is reviewed to determine if it is complete and free of any unexplainable abnormalities.
- 3. Designing** high-level infrastructure. Based on blueprinted solutions, NTT applies best practices, identifies the best execution venue and target technology to meet your business outcomes.
- 4. Validating** that the design matches business objectives. High-level design and roadmap are reviewed and refined in successive short meetings or video calls until approved.

“ Valuable insight into your current infrastructure and applications to **provide a clear roadmap to Managed Services.** ”

At-A-Glance

Business Outcome	Benefits
Great insights at no cost	Free of charge for qualified clients
Quick delivery based on proven blueprint solutions	Thanks to a predefined approach and tools that provide quality and agility
Migration from any platform to any platform	Technology, platform, and vendor agnostic
A recommended roadmap	We deliver a read-out to share the results of the engagement, recommendations, and action plan

Service	Key Features
Migration from any platform to any platform	<ul style="list-style-type: none"> • Platforms supported include VMware, Hyper-V, Azure, AWS, GCP OCI, Nutanix and others • Technologies supported include IaaS, PaaS, Serverless and others • Containerization supported includes, but not limited to: Google Kubernetes Engine (GKE), Azure Kubernetes Service (AKS), Amazon Elastic Container Service for Kubernetes (EKS), Amazon Elastic Container Service (ECS), AWS Fargate, and Docker on IaaS virtual machines
Proven blueprints	Tried and tested blueprints based on best practices, certified products, and years of experience
Risk mitigation	We have over 15 years of expertise in platform migrations
Top cloud partnerships	Partnership and accreditations with all major cloud vendors
Our own IP tooling	We leverage our own IP (NTT Discover®, NTT Núvol® and NTT ENZiME®) combined with leading commercial tools, used by our highly qualified experts to deliver a quality and agile migration experience
Managed Services Platform	Supports the transition process and management of infrastructure globally

Main Destinations for Our Cloud Migrations:

NTT Data Centers

Gold Microsoft Partner
Azure Expert MSP

aws partner network
Premier Consulting Partner

MSP Partner
Migration Competency
DevOps Competency
Solution Provider
Channel Partner

Our Certifications and Attestations:

ISO 27001
ISO 20000

Service Management

Service Control Reports

Why NTT?

Global reach and local delivery

Identical delivery and methodology a cross regions to provide a truly consistent global service.

Full lifecycle service

Convert goals into outcomes thanks to a full IT stack from data center and network to cloud and applications.

Extensive track record

Real-world experience delivering successful business transformation projects.

Industrialized yet vendor-agnostic

Highest level of partnerships with major cloud vendors.
