

Cloud Migration Services

# Cloud Migration Services

Achieve enterprise agility with our fast track to cloud

Seamless migration of every workload to the optimal platform, **improving operational efficiency, scalability and agility.**

**Our end-to-end service for cloud migrations begins with auditing your workloads for migration suitability. We will then plan and manage the migration to the best-fit platform without any disruption to daily operations and business.**

## How We Deliver

We support many migration types. Our unique approach is built on many years of experience and is designed to accelerate the migration process and mitigate risk. You will benefit from our tried and tested blueprints based on best practices, certified products, and experience to accelerate the migration process and mitigate risk.

We will audit your current IT landscape to discover workloads and infrastructure eligible for migration. We will prepare a detailed migration plan for you, minimizing service disruptions and risks during the move. Then we'll migrate the workloads accordingly.

After the migration, we can manage the workloads and infrastructure for you, or leave that up to you.

## At-A-Glance

Business Outcome	Benefits
<b>Unified global service delivery model</b>	Worldwide consistency in service delivery
<b>More agile, scalable, and flexible IT resources</b>	Ability to react quickly to a changing business environment
<b>Lower capital investments and operating costs</b>	Match IT resource demands with requirements without incremental capital investment
<b>Maintain security and meet compliance requirements</b>	Mitigations of business risk

## The 6Rs we align our migration types to:

					
<b>Rehost</b>	<b>Replatform</b>	<b>Refactor</b>	<b>Repurchase</b>	<b>Retain</b>	<b>Retire</b>
Lift and shift	Lift, shift and tweak	Rebuild <sup>1</sup>	Drop and shop	Don't touch	Eliminate

## Start With An Assessment

A **Cloud Migration Assessment** or a **Cloud Foundations Service** enables us to recommend your journey to multi-cloud. We'll recommend improvements to your current platform route to multi-cloud and where to strategically position your workloads to support your business.

Service	Key Features
<b>Migration from any platform to any platform</b>	<ul style="list-style-type: none"> <li>Platforms supported include VMware, Hyper-V, Azure, AWS, GCP OCI, Nutanix and others</li> <li>Technologies supported include IaaS, PaaS, Serverless and others</li> <li>Containerization supported includes, but not limited to Google Kubernetes Engine (GKE), Azure Kubernetes Service (AKS), Amazon Elastic Container Service for Kubernetes (EKS), Amazon Elastic Container Service (ECS), AWS Fargate, and Docker on IaaS virtual machines</li> </ul>
<b>Tested blueprints</b>	Tried and tested blueprints based on best practices, certified products, and years of experience
<b>Risk mitigation</b>	We have over 15 years of expertise in platform migrations
<b>Top cloud partnerships</b>	Partnership and accreditations with all major cloud vendors
<b>Our own IP tooling</b>	We leverage our own IP (NTT sDiscover®) combined with leading commercial tools, used by our highly qualified experts to deliver a quality and agile transition experience
<b>Managed Services platform</b>	Supports the transition process and management of infrastructure globally

Service Control Reports

### Why NTT?

**Global reach and local delivery**  
Identical delivery and methodology across regions to provide a truly consistent global service.

**Full lifecycle service**  
Convert goals into outcomes thanks to a full IT stack from data center and network to cloud and applications.

**Strategic cloud partnerships**  
Partnership and accreditations with all major cloud vendors.

**Comprehensive portfolio of services**  
NTT provides consulting, technical, and managed services to help you at every stage of your journey to the cloud.
