

Support Services | Database Solutions

Business Intelligence Services

Turn your data into meaningful information and valuable insights, where and when you need it

To support data-driven decision-making across the enterprise, organizations worldwide are adopting business intelligence (BI) technologies and practices.

With experience across the Microsoft SQL Server Business Intelligence stack, our teams can help you optimize your BI environment so it produces structured, repeatable analytical reporting and more customized information from diverse sets of data and inputs.

Our two key services are **Business Intelligence** and **BI Management**.

Business Intelligence

Generate greater insights about every aspect of your business

We work with you to develop a BI strategy specific to your unique requirements, and design and deploy solutions using Microsoft technologies. Whether it be for sales reporting, financial forecasting or any other analytical requirement, we've got you covered.

BI Management

Make sure your intelligence investments are working for you

To provide you with assurance that your analytical investments are achieving the best possible outcomes for your organization, we review, monitor and report on the configuration, performance and security of your BI assets.

Why Database Solutions

Database expertise and capabilities

Our highly experienced and certified database administration (DBA) team specializes in managed and professional services for Microsoft SQL Server and BI environments, Oracle databases and general data management projects. And our team of certified senior database specialists can address any complex SQL Server, Oracle, BI or general data management requirements.

Services and support

We deliver our proactive DBA services through our partners or direct to our clients, providing 24x7 support with contracted SLAs for the most complex environments in the market.

Global expertise

NTT Ltd. is a leading global technology services provider. Our global assets and integrated ICT stack capabilities provide unique offerings in cloud-enabling networking, hybrid cloud, data centers, digital transformation, client experience, workplace and cybersecurity.
