Dedicated Cages and Suites

Securely store your data in our high-availability environment

Our Dedicated Cage and Dedicated Suite products offer a high degree of flexibility in our colocation data centers. The separate server spaces are pre-installed in terms of cooling and safety systems – the design is up to you. You're free to choose your rack layout, connection and port placement.

Individuality made easy

Scaling your own highly secure data center with maximum connectivity within our colocation data center is easy with our Dedicated Cages and Suites

Dedicated Cage

Starting from a size of around 30m², you can book your Dedicated Cage. The lockable spaces within our colocation areas are fully secured and can be sized and equipped according to your specifications.

Dedicated Suite

For larger-scale operations, we offer Dedicated Suites. The suite size depends on the building design but generally ranges between 400-800m².

The whole suite can be fitted-out according to your specifications and layout requirements.

Flexibility meets security

Our Dedicated Cages and Suites are equipped with an uninterruptable power supply through two separate sources (A/B routes). Power consumption is fully transparent, and further details about your space can be seen in monthly reports.

Connectivity and electric cabling is dependent on the respective data center design - either installed in raised

floors or overhead distribution systems and can be adapted to your requirements.

You're free to bring your containment systems, racks or cable trays, or with the help of our experts, find a fitting solution for your equipment.

Dedicated Cages are built with secure steel grids. The metal cages provide climb-over protection and separations are installed in the cabling area.

For suites, solid masonry walls ensure exclusive access for you.

High sensitivity smoke detectors ensure the fast detection of a fire. Gas-based extinguishing systems provide a quick response with minimal risk to your equipment. Each Dedicated Suite forms a separate fire zone with a fire resistance class of F90 (fire resistance duration of 90 minutes).

Scaling your own highly secure data center **and become part of our hyperconnected, Multi Service Interconnection Platform.**

Services on-site

24/7 access and support

You can access your data center any time. Our dedicated Client Success Manager and Service Team are ready to support you and your team.

Pre-Cabling

Fiber network pre-cabling is provided by our experts to ensure you remain connected to the wider world.

Implementation services

On request, we offer rack and power installations, CCTV and other services based on your needs.

Why NTT?

Global Data Centers is a division of NTT Ltd. Our global platform is one of the largest in the world, spanning more than 20 countries and regions, including the Americas, Asia Pacific, EMEA and India. NTT is routinely recognized as a Leader by leading networking and data center analysts.

As a neutral operator, we offer access to multiple cloud providers, a large variety of internet exchanges and telecommunication network providers including our own IPv6-compliant Tier 1 Global IP Network.

You benefit from tailored infrastructure, and experience consistent best practices in design and operations across all of our reliable, scalable and customizable data centers. We're ready to facilitate client adoption of next-generation technologies for computing at scale, virtualization, data migration, and cloud and B2B private connectivity both regionally and across the globe.

We're a signature partner of the Climate Neutral Data Centre Pact, committed to becoming climate neutral by 2030, as part of the European Green Deal.

Our services at a glance

Connectivity services

All of our data centers offer redundant Carrier-Meet-Me-Rooms (CMMR) and interconnection platforms.

This provides you with the benefits of our extensive interconnection ecosystem.

Cloud Connect services

Our Multi Service Interconnection Platform enables you to directly connect to all global IT and cloud service providers in all our data centers.

Additional Services

Our Additional Services portfolio includes features and benefits with Managed Data Center services, Remote Hands services, Reporting and Support services.

Operational reliability

Our services are backed by years of experience as well as our track record of compliance with the highest levels of operational safety for data centers.
