

Network as a Service

Enterprise Internet Services

Accelerate your business with reliable connectivity

Premium corporate internet connectivity

Enterprise Internet Services is our premium corporate internet connectivity service, tailored specifically to businesses operating in the Asia-Pacific (APAC) region. We go beyond providing reliable connectivity by offering local-language support and comprehensive one-stop ISP solutions. With our unwavering commitment to seamless communication and secure access, you can count on us as your trusted partner for your online success. Contact us today to find out how we can take your business to new heights.

Global IP Transit AS2914

Harness the power of AS2914 to optimize domestic routing paths, using direct internet exchange connections to deliver an unparalleled customer experience.

Enterprise Internet Services (EIS) leverages the Tier 1 Global IP Network AS2914, which is ranked among the top five networks worldwide, and comes with APAC domestic routes to:

- Australia
- Cambodia
- Malaysia
- Myanmar
- Singapore
- Thailand

For exact availability, please check with your EIS representative.

Blackhole routing for DDoS mitigation

Rely on our state-of-the-art mitigation services as a countermeasure to distributed denial-of-service (DDoS) attacks.

NTT DATA's Looking Glass for routing information

Gain access to our robust backbone infrastructure network to verify routing information. (This service is not appropriate for measuring service level agreements.)

Our offerings

Ports offered by EIS:

Gigabit Ethernet

Ten Gigabit Ethernet

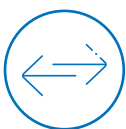

Reliable connectivity to accelerate your business

EIS provides a robust and reliable connection to minimize downtime and interruptions. This enables your business to operate smoothly – and without disruptions that can hinder productivity and customer satisfaction.

High-speed performance for seamless communication

Enjoy a high-speed internet connection that enables fast data transfer and seamless communication. This enhanced performance optimizes workflows, accelerates processes and improves collaboration, allowing your team to work more efficiently.

Flexible scaling to meet your business requirements

Whether you're experiencing rapid growth, expanding into new markets or implementing new technologies, EIS can accommodate your increased bandwidth requirements, ensuring that your connectivity keeps pace with your evolving business demands.

Enhanced network security

Protecting your business-critical information infrastructure, EIS incorporates advanced filtering techniques specifically designed to mitigate DDoS attacks and effectively quarantine known DDoS traffic destined for a target host. By implementing this additional layer of security, your business can confidently safeguard its critical information and internet connectivity.

Maximize connectivity and cost savings

By consolidating connectivity into a single, comprehensive solution, you also simplify network management and save costs on managing multiple connections.

“ Our premium corporate internet connectivity service is tailored specifically to APAC businesses. We go beyond just providing reliable connectivity by offering local-language support and comprehensive one-stop ISP solutions.

“ We leverage the Tier 1 Global IP Network AS2914, which is ranked among the top five networks worldwide and comes with APAC domestic routes to Australia, Cambodia, Malaysia, Myanmar, Singapore and Thailand.

The NTT DATA advantage

Powered by Global Tier 1 (AS2914)

We use a Global Tier 1 backbone (AS2914) as well as domestic routes and direct connections to several internet exchanges to ensure reliable and fast internet access – and deliver the best possible routing and internet access experience to our clients

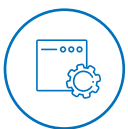

Border Gateway Protocol (BGP) communities

NTT DATA stands as the unrivaled industry leader in BGP communities, offering an extensive array of communities, and transparent routing policies. As an EIS client, you can count on us for secure and dependable internet access.

Dedicated 24x7 support

We offer round-the-clock client support to address any connectivity issues promptly. Our support team can also provide guidance and assistance in optimizing your connectivity solutions based on your specific requirements.

Latest technology

Rest assured that we use the latest technology, ensuring our system is always up to date and optimized to facilitate smooth operations and performance for our clients.
